

FALCON EYE BY INFUSION

FROM 50,000 FEET ABOVE OR INSIDE A BUILDING, FALCON EYE GIVES ORGANIZATIONS THE VISION TO SUCCEED

Falcon Eye allows business and governments to navigate real-time, three-dimensional data across the internet, desktop, and Microsoft Surface. Inspiring presentation capabilities allow Falcon Eye to serve as a powerful management dashboard or a uniquely branded sales tool.

Whether locating and touring real estate properties for clients, positioning police and emergency personnel on city streets, or viewing an oil pipeline's infrastructure – Falcon Eye delivers concise, real-time business intelligence and GIS data to businesses and governments.

NAVIGATE A WORLD OF DATA

Spend less time lost in technical details and more time answering questions.

Using a natural and intuitive interface, Falcon Eye allows users to drill down into data at any level – global, state, county, city, or street-level. Combined with Microsoft Surface or Windows 7, Falcon Eye delivers actual hands-on manipulation of data.

Falcon Eye's unique ability to effectively display complete data sets gives organizations the ability to find the answers they need faster and in a collaborative fashion. Falcon Eye eliminates the need for navigating data with a mouse and keyboard, reducing the amount of time spent searching and increasing the time available for answering essential questions.

STAY AHEAD OF THE CURVE

Falcon Eye uses powerful emerging technologies with proven delivery capabilities.

Built using Microsoft Bing Maps (formerly Virtual Earth), fully compatible with Windows 7, and leveraging the Microsoft .NET platform, Falcon Eye seamlessly integrates information from a wide range of sources. Falcon Eye overlays multiple data streams on a virtual globe that allows organizations to view the effects of decisions and "what if" scenarios in real-time.

Infusion recognizes organizations often employ a variety of reporting systems, each with their own unique format and view. With the ability to incorporate multiple data sources into a consolidated view, Falcon Eye delivers complete, accurate geospatial data.

HOW DO I GET STARTED WITH FALCON EYE?

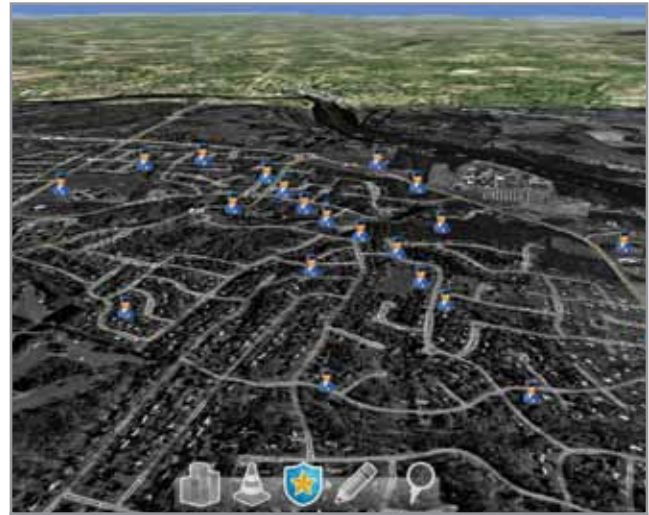

Each installation of Falcon Eye is managed by a dedicated team of Infusion developers.

The Infusion in-house design team will work with your organization to customize Falcon Eye to fit your data and branding needs. Infusion developers will implement your vision to produce a customized version of Falcon Eye that provides a complete view of your data.

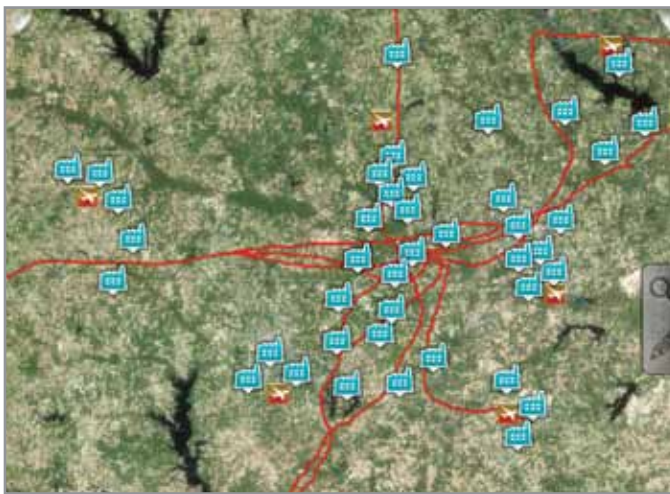

Infusion's expertise developing enterprise applications for industries including Hospitality and Tourism, Oil & Gas, Real Estate, Retail, and the Public Sector ensures you will have access to the right tools and information with your Falcon Eye solution. The examples below demonstrate Falcon Eye's suitability for a variety of applications:

Real Estate & Retail: Sales Portals

Public Sector: Real-Time Data Streaming

Oil & Gas: Information Integration

Real Estate & Retail: Sales Portals

Search for and identify properties, view and tour buildings inside and outside, and simultaneously link customers with agents and agents to their office.

Public Sector: Real-Time Data Streaming

With no refreshing, automatic updates, or re-draws, Falcon Eye effortlessly streams the data you need – like the location of police units on a city grid – straight to your fingertips.

Oil & Gas: Information Integration

With Falcon Eye's unprecedented, flexible integration capabilities, you can manage and manipulate real-time information, such as Oil & Gas pipeline data, directly from your ESRI ArcGIS Server.
