

For Immediate Release**Infusion Selected by Ontario Government as Vendor of Record for Task-Based and Solutions-Based I&IT Services**

Toronto, ON – December 8, 2011 - Infusion announced today that it has been selected as a Vendor of Record (VOR) for the Government of Ontario in both task-based (OSS-00175018) and solutions-based (OSS-00195390) information and information technology services.

"Gaining VOR status with the Ontario Government is a great stepping stone for us to provide unique and innovative solutions to the broader public sector," said Chris Amor, Business Development Manager, Infusion. "This type of pre-qualification allows for Infusion to work more closely with key public sector organizations to drive innovation, improve citizen services, and save time and money."

The Ontario Government allows qualified organizations to apply to become a VOR every three years. Gaining this status allows broader public sector organizations, including municipalities and services organizations, to approach the vendors directly in a three bid system.

The solutions-based Vendor of Record list puts Infusion in elite company, as qualifying vendors are required to have delivered projects in excess of \$5 million in value that require specialized skills in a variety of technologies.

Infusion has been qualified in the following areas:

Task-Based I&IT Services:

- Business Analysis & Planning
- Architecture
- Solutions Development
- Deployment & Operations

Solutions-Based I&IT Services

- Business Analysis & Planning
- Architecture
- Solutions Development
- Testing & QA
- Systems Integration/Deployment & Operations
- Security
- Information Management
