

For Immediate Release

Infusion Supports Windows High Performance Computing Launch

New York, USA- September 20th, 2010- Infusion is poised to support Microsoft's commitment to technical computing by participating in a series of Windows HPC Server 2008 R2 launch events taking place this month throughout the US and Canada starting on September 20th when this new product is released. Infusion is committed to developing solutions for the financial services industry- which is a key area of focus for HPC- and in supporting Microsoft's vision of making supercomputing broadly available across client, cluster and cloud.

"Continuing to develop capacity in High Performance Computing provides us business development opportunities with both new and existing customers where expert system integration services are required" said, Steve Ellis, Executive VP, Sales & Business Development, Infusion. "Never before has supercomputing been more equipped with computational power to assist experts with decision making, speed and innovation".

Infusion is working directly with clients to help them take advantage of existing HPC technology investments and employee skill sets to minimize cost, maximize returns and extend the power of their data.

"Our customers rely on Windows HPC Server to run a wide variety of mission-critical applications," said Bill Hamilton, Director, Technical Computing, Microsoft Corp. "Microsoft is excited to be working with an ecosystem of companies like Infusion to help customers take full advantage of Windows HPC Server 2008 R2 and support the evolving computational needs of the financial services industry."

Technical computing has evolved over the years and now has three keys areas of focus that Infusion is set to take advantage of and offer clients including, an opportunity to utilize the cloud, new tools which ensure more effective consistent parallel programming and a series of updates that significantly increase speed.

ABOUT INFUSION

Infusion (www.infusion.com) solves business problems by combining expert software engineering with appealing user experiences. Through a unique combination of enterprise development, innovative design, and a commitment to emerging technologies, Infusion offers a full suite of IT services including: custom architecture, training and mentoring, hosting and support, and user experience solutions.
